V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement**1. Statement**

Novelty (N)	Claims	1-12	YES
	Claims		NO
Inventive step (IS)	Claims		YES
	Claims	1-12	NO
Industrial applicability (IA)	Claims	1-12	YES
	Claims		NO

2. Citations and explanations

The subject matters of claims 1-12 do not appear to involve an inventive step in view of document 1 [JP, 9-28366, A (Japan Tobacco Inc.), 4 February, 1997 (04.02.97)] cited in the ISR.

Document 1 describes the application of a solution consisting of a perfume and a polyhydric alcohol (propylene glycol, etc.) to cigarette paper using an ethylene-vinyl acetate copolymer as a binder, and it is merely an ordinary technique practiced as required by a person skilled in the art, to derive and apply the optimum ranges of the solid content, ethylene content and the like of the binder based on, for example, an experiment. Document 1 describes that the ratio of the binder is much larger than that of, for example, the perfume, and a person skilled in the art should set the ratios of respective ingredients as required. Furthermore, since document 1 describes that the binder is applied as a seaming glue of ordinary cigarette paper, a person skilled in the art could have easily applied a binder containing said perfume and others, to cigarette paper as a seaming glue.
